a

BA1 1_A7 · accepted (5/5 Acc. votes) | BA1 1_G1 · rejected, stalled (0/5 Acc. votes) | BA2 2_C6 · rejected, overgrown (1/5 Acc. votes)

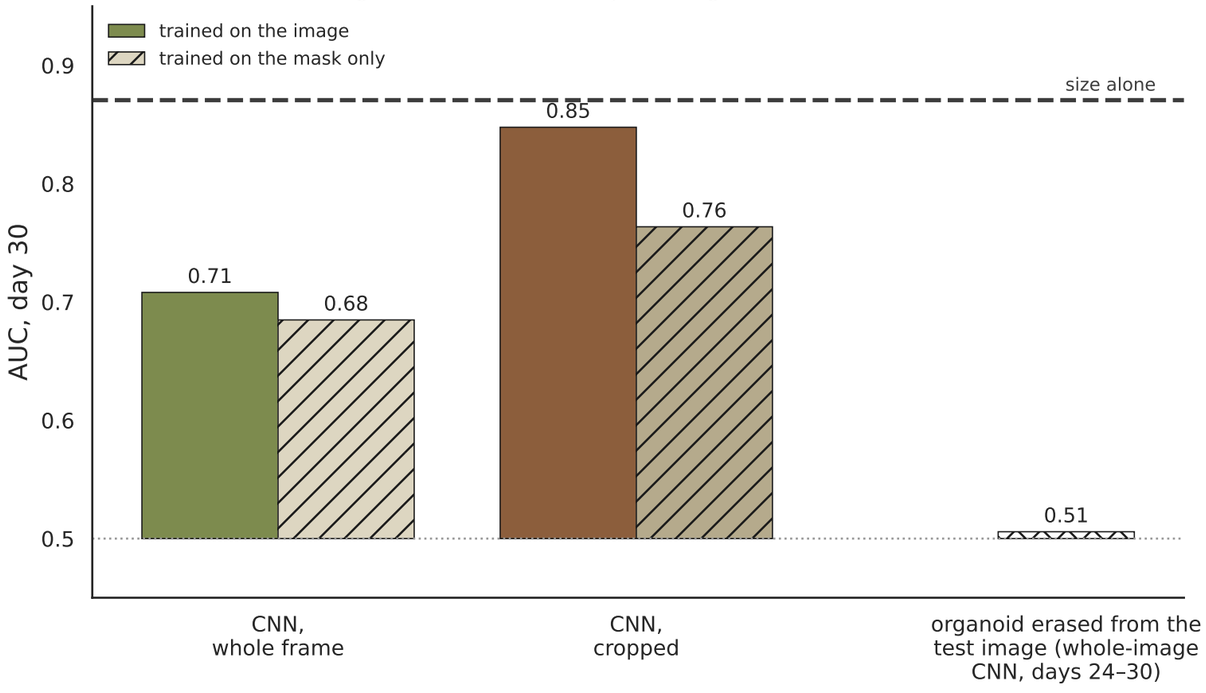

b

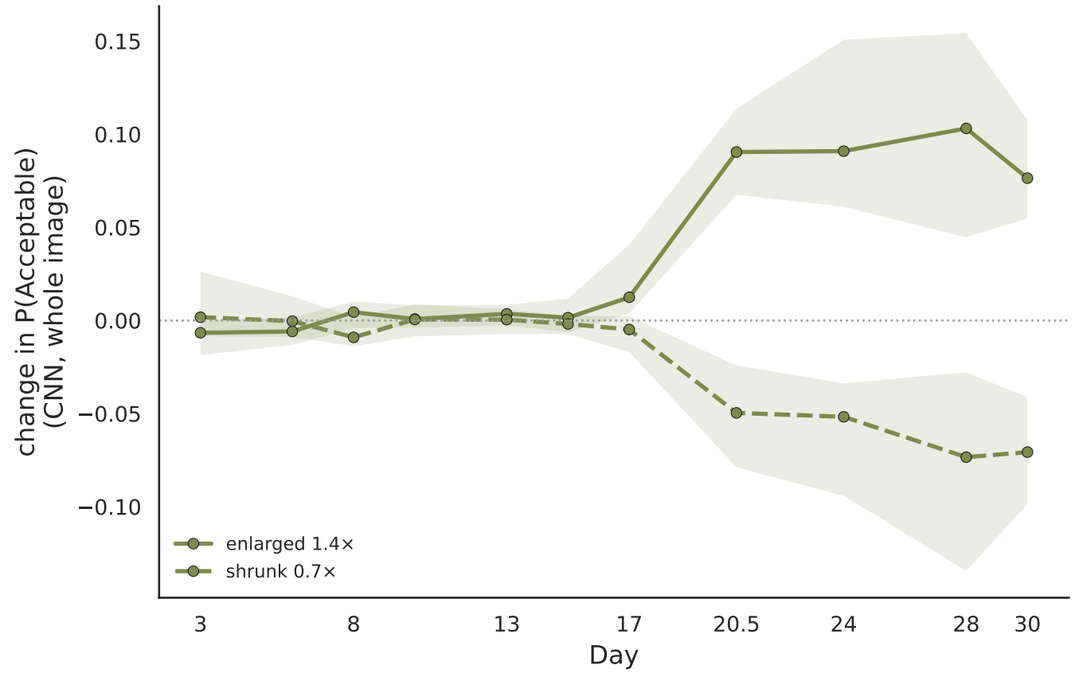

c

No texture needed: a CNN trained on the mask alone gets most of the way; no organoid → chance

d

Only resize the organoid: bigger → 'more acceptable'

What no model catches: 7 of 33 rejects (21%) are called Acceptable by every method (growth rule, all CNNs, LSTM); next to each, the same-plate accepted organoid closest in size

e
